Professional Summary

Python Backend Developer and Data Engineer with 1+ years of professional experience in backend development, SQL development, cloud automation, and enterprise data engineering. Experienced in building REST APIs using Flask, developing database-driven applications, automating enterprise workflows, integrating third-party APIs, and designing cloud-based ETL pipelines. Proficient in Python, SQL, PostgreSQL, Azure Data Services, Docker, and Git with hands-on experience delivering scalable backend applications and automation solutions.

Technical Skills

Programming Languages

- Python
- SQL
- JavaScript

Backend Development

- Flask
- REST APIs
- JWT Authentication
- SQLAlchemy
- Requests

Databases

- PostgreSQL
- Microsoft SQL Server

Cloud & Data Engineering

- Microsoft Azure
- Azure Data Factory
- Azure Databricks
- Azure Data Lake Storage Gen2
- Google Cloud Storage
- PySpark
- Pandas
- NumPy
- Power BI
- S3

- VPC
- IAM
- EC2

Tools & Technologies

- Git
- GitHub
- Docker
- Postman
- CI/CD
- ManageEngine
- JIRA

Operating Systems

- Linux
- Windows

Professional Experience

SQL Developer

Balbhas Business Sysnomics LLC (January 2026 – Present)

- Developed optimized SQL queries, stored procedures, and database objects to automate enterprise reporting and operational workflows.
- Investigated and resolved production database issues while maintaining strict SLA compliance.
- Improved ERP reporting performance by optimizing SQL queries and resolving database bottlenecks.
- Collaborated with application development teams to improve database schema design and backend performance.
- Generated business and operational reports supporting organizational decision-making.

Web & Database Developer

Cloud Hawk (January 2024 – February 2025)

- Developed backend web applications using Python and Flask.
- Designed REST APIs and implemented backend business logic.
- Processed and transformed datasets using Pandas and NumPy.
- Customized frontend interfaces using HTML, CSS, and JavaScript.
- Managed deployments, debugging, and Git-based version control.

Projects

Enterprise Email Automation Pipeline

Python | Gmail API | Google Cloud Storage | Jira REST API | OAuth 2.0 | PyInstaller

- Developed a modular Python automation application that securely authenticates users using Gmail OAuth 2.0.

- Exported Gmail metadata into timestamped JSON files for backup and reporting.
- Automated backup of exported email metadata to Google Cloud Storage.
- Integrated Jira REST API to automatically create issue tickets after successful pipeline execution.
- Implemented configurable Gmail search queries, interactive CLI menus, execution logging, and safe email cleanup with user confirmation.
- Packaged the application as a standalone Windows executable using PyInstaller.

Workforce Management System

Python | Flask | PostgreSQL | JWT | Docker | Postman

- Developed a secure backend platform implementing Role-Based Access Control (RBAC).
- Implemented JWT-based authentication and authorization.
- Designed normalized PostgreSQL schemas using SQLAlchemy ORM.
- Built REST APIs for workforce and timesheet management.
- Containerized the application using Docker for consistent deployment.

Azure Data Engineering Pipeline

Python | Azure Data Factory | Azure Databricks | PySpark | ADLS Gen2 | Power BI

- Designed and implemented an end-to-end cloud data engineering pipeline.
- Automated ETL workflows using Azure Data Factory.
- Processed enterprise-scale datasets using PySpark in Azure Databricks.
- Implemented Medallion Architecture (Bronze, Silver, Gold) in Azure Data Lake Storage.
- Built Power BI dashboards to visualize operational and sales KPIs.

Doctor Appointment Management System

Python | Flask | PostgreSQL | Docker

- Developed a backend application for doctor appointment scheduling and patient management.
- Implemented user authentication and CRUD operations.
- Designed relational PostgreSQL database schemas.
- Managed Docker-based deployment and Git version control.

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- AWS Certified Cloud Practitioner (CLF-C02)

Education

Master of Science (Computer Science) - Scott Christian College of Arts & Science - 2022

Bachelor of Science (Computer Science) - Kongunadu Arts & Science College - 2020
